

Construction Engineer (m/f/d)

Kraftblock - Energy Storage Solutions

Climate change is one of the most serious challenges of our time. The world needs to shift to renewable energy and has to decarbonize industries massively.

At Kraftblock we strongly believe in a sustainable energy system where storage is essential. Our mission is to create high-performance heat storage solutions that support the efforts of tackling climate-change and increasing sustainability, especially in industries and energy production.

Construction Engineer (m/f/d)

You will be at the heart of our engineering process and responsible for the construction of standard-components but also develop new components and alternative solutions that help our teams to stay at the very forefront of all developments!

Your Day:

- Design and construct plant components
- Develop construction solutions independently according to specification sheets
- Implement and coordinate simultaneously running projects
- Prepare specification sheets, component lists and other project documents
- CFD simulation, 3D modelling and creation of technical drawings

Your Profile:

- Degree in mechanical or plant engineering, mechatronics or similar degrees
- Professional experience in the field of mechanical engineering, in particular experience in the development of components
- Practical experience in mechanical design with a common CAD system like Solid Edge
- Ability to program and execute simulations in MATLAB and/or CFD's like Solid Edge
- High level of self-reliance with the ability to work in a team, as well as autonomously
- Goal-oriented, motivated work style with quick analytical grasp
- Flexibility and hands-on attitude
- Fluency in English and German, additional languages are a plus

We Offer:

- Exciting and diverse tasks with a high degree of personal responsibility
- Innovative and casual working environment
- Attractive, long-term career path with promotion opportunities and competence training
- Unlimited employment contract with flexible working hours

At Kraftblock, our goal is to make a long-term and sustainable contribution to the transition to 100% renewable energies. Kraftblock possesses a key technology for the transformation of the energy market and is backed by top investors who have many years of experience in supporting start-ups with deep technology. Now we are looking for highly talented and visionary people who follow our mission and live the idea of making Kraftblock the leading energy storage solution. If you feel committed to our vision, we look forward to receiving your application: hr@kraftblock.com
