

Energy Engineer (m/f/d)

Kraftblock - Energy Storage Solutions

Climate change is one of the most serious challenges of our time. The world needs to shift to renewable energy and has to decarbonize industries massively.

At Kraftblock we strongly believe in a sustainable energy system where storage is essential. Our mission is to create high-performance heat storage solutions that supports the efforts of tackling climate-change and increasing sustainability, especially in industries and energy production.

Energy Engineer (m/f/d)

You will be at the heart of our design- and layout process and responsible for the ideas, concepts and primary designs of our high-performance-storage system to help our teams to keep at the very forefront of all developments!

Your Day:

- Develop, project and construct new types of storage systems independently
- Plant design and dimensioning
- Prepare draft and execution plans
- Coordinate with customers

Your Profile:

- Degree in electrical engineering, power engineering or similar studies
- 3+ years of professional experience in power engineering or thermodynamics
- Interdisciplinary knowledge in the field of mechanical engineering, especially in-depth knowledge in the development and design of components
- Ease of interaction with other functions
- Practical experience in mechanical design with a common CAD system, Solid Edge advantageous
- High level of self-reliance with the ability to work in a team, as well as autonomously
- Goal-oriented, motivated work style with quick analytical grasp
- Flexibility and hands-on attitude
- Fluency in English and German, additional languages are a plus

We Offer:

- Exciting and diverse tasks with a high degree of personal responsibility
- Innovative and casual working environment
- Attractive, long-term career path with promotion opportunities and competence training
- Unlimited employment contract with flexible working hours

At Kraftblock, our goal is to make a long-term and sustainable contribution to the transition to 100% renewable energies. Kraftblock possesses a key technology for the transformation of the energy market and is backed by top investors who have many years of experience in supporting start-ups with deep technology. Now we are looking for highly talented and visionary people who follow our mission and live the idea of making Kraftblock the leading energy storage solution. If you feel committed to our vision, we look forward to receiving your application: hr@kraftblock.com
