

Project Engineer (m/f/d)

Kraftblock - Energy Storage Solutions

Climate change is one of the most serious challenges of our time. The world needs to shift to renewable energy and has to decarbonize industries massively.

At Kraftblock we strongly believe in a sustainable energy system where storage is essential. Our mission is to create high-performance heat storage solutions that support the efforts of tackling climate-change and increasing sustainability, especially in industries and energy production.

Project Engineer Steam (m/f/d)

You will be our all-round genius, that perfectly understands our and our customer's technology, in particular in the field of steam driven processes, coordinates the whole project scope from engineering to the integration and you are the best friend to our customer and partners - abilities that will perfectly contribute to our growth strategy!

Your Day:

- Primary contact to our customer during the projects
- Project-coordination internally and externally
- Come up with new ideas and think out of the box
- Establish and manage project teams, select the necessary resources
- Distribute tasks and responsibilities
- Determine deadlines
- Monitor budgets

Your Profile:

- Degree in mechanical or plant engineering, mechatronics or similar studies
- Work experience in the field of mechanical engineering, especially in-depth experience in projects dealing with the integration of steam driven processes
- Sound knowledge of relevant standards for integrating steam process lines
- Practical experience in project-management
- High degree of individual responsibility with the ability to work in a team, as well as autonomously
- Goal-oriented, motivated work style with quick analytical grasp
- Fluency in English and German, additional languages are a plus

We Offer:

- Exciting and diverse tasks with a high degree of personal responsibility
- Innovative and casual working environment
- Attractive, long-term career path with promotion opportunities and competence training
- Unlimited employment contract with flexible working hours

At Kraftblock, our goal is to make a long-term and sustainable contribution to the transition to 100% renewable energies. Kraftblock possesses a key technology for the transformation of the energy market and is backed by top investors who have many years of experience in supporting start-ups with deep technology. Now we are looking for highly talented and visionary people who follow our mission and live the idea of making Kraftblock the leading energy storage solution. If you feel committed to our vision, we look forward to receiving your application: hr@kraftblock.com
